

TEXO at ITMA ASIA + CITME 2008

The ITMA 2007 in Munich was a great success for TEXO. Our booth was much frequented with visitors interested in seeing our latest developments for forming and press fabric weaving. We thank you for showing such an interest in our company and hope to see you at the ITMA ASIA + CITME 2008.

Launching a new upgrade package

We at Texo is always working on improvements for your existing looms to make your machine more productive. The less maintenance and service your machine requires the more cost effective it gets. As a result of our ambitions we have put together a package for the loom drive suitable for your wider machines with cylindrical drive gears and stand still function. The rebuilding package includes our latest standard of eccentric drive gears and AC motors with frequency control. Don't hesitate to contact us for information.

NEWS AND NOTES

➔ ITMA ASIA + CITME 2008

TEXO AB will participate in ITMA ASIA + CITME 2008 which is held between 27th and 31st of July 2008 at Shanghai New International Expo Centre, Shanghai China. TEXO AB welcomes You to our stand **A14** in hall **E5** for a relaxed meeting.

➔ New Office in Shanghai

During the exhibition we will introduce you to our new office in Shanghai. TEXO Pacific Ltd located in Waiganoqiao will support our growing customer base in Asia and China in particular.

➔ Next ITMA Europe

Next ITMA will be held in Barcelona in 2011. More information will be presented in coming Bulletins.

President speaking

New innovations based on productivity and quality are our Guiding Stars.

The first year as the president of TEXO AB has been very interesting in many ways; we launched our new high-speed forming loom TransCent at the ITMA show in Munich held in September 2007. This event was better than expected from our side when it came to customers visiting our booth. Apart from TransCent we of course also presented other products of our wide range of weaving and warping equipment for the manufacturing of PMC. The total number of looms delivered during 2007 was a milestone. Also the fact that the market demand of our machines is increasing is an indicator of our good work. To meet the current demand as well as the future one we keep on striving to push technical innovations further with the guiding stars of productivity and quality. This is more important than ever. We will continue to increase productivity by developpe new loom platforms and strengthening our service on existing machines. In this issue you can read about some of them.

Please do not forget to visit us at ITMA-ASIA in Shanghai during the last week of July this summer.

Of course we also welcome the new members of the TEXO-team.

A strong team ready to serve you!

Anders Svensson

Jan Lindberg

Service Engineer

Service of existing looms. Commissioning of new installations. Rebuildings and technical support.
