

ITMA ASIA 2008

Between the 27th and the 31st of July the ITMA ASIA 2008 was held in Shanghai.

TEXO AB participated in ITMA ASIA + CITME 2008 which was held between the 27th and 31st of July 2008 at **Shanghai New International Expo Centre, Shanghai China**. This event was better than expected when we summoned the number of customers visiting us. Our booth was filled with guests, both from local Asian and from Western PMC manufacturers. Many were interested in seeing our latest developments for forming and pressing fabric weaving. We thank you all for showing such an interest in our company and product range and hope to see you at the next ITMA show, which will be held in Barcelona in 2011.

NEWS AND NOTES

Texo Pacific Co Ltd

We are now establishing a service office in Asia; Texo Pacific. With this our expectation is to deliver spare parts and competence at an even higher speed than before. We will also be able to keep pace with the development in this area in a better way. We believe that closeness is an important factor for your choice of business partner and You are important for our progress. Our wish is a growing market and a lot of years with You as our customer. More details about our Asian service center will be launched in the next issue of the Bulletin.

Quick delivery of Spare Parts

Did you know, we keep in store for You, around 40 000 different items. You can get spare parts for all the machines we supply; Forming-Press-Dryer loom, Warper and Tapics. More items are adding up every week as the new techniques keep evolving.

Our goal is to keep the most important spare parts in stock and to send it with as little delay as possible, to avoid long, costly production stops for our customers. An order placed with us before 1:00 PM could be shipped the same day with UPS if the weight is below 70 kg. Our good selection of spare parts in stock and our quick deliveries should make us the best choice as your spare parts supplier.

We will always be able to provide you with an original part or a replacement part, or combination of parts designed for the required function on your particular machine. However when it comes to electrical and computer parts they become obsolete and unavailable from the original vendors much faster today than in the past. This can sometimes create a challenge for us, and to avoid production interruptions in your Texo looms we strongly recommend that you contact us and we can provide you with upgrade kits suitable for the critical areas of the control system on your particular loom.

Using your Texo manuals and drawings provided with the machine you can identify the part you might need. You also have the option to log into our web page and identify the part number of the part. If you are not sure about the part number, or if your documentation or the web page can't help you, just take a picture of the item and e-mail it to us with loom number, and we will be able to help you in no time at all.

Today we deliver spare parts from TEXO AB SWEDEN, TEXO INC USA and TEXO Pacific Co, Ltd, CHINA.

Give me a call at +46-476-56037
or
send an e-mail to service.johnsson@texo.se.

We look forward to hearing from you!

Kjell Johnsson

TEXO – Your worldwide supplier of looms and Spare parts. Never further away than a phone call.

We wish you all

*a Merry Christmas
&
a Happy New Year!*

President speaking

We are approaching the end of the year "2008" and Christmas is just around the corner.

As we reflect on this year, it will be remembered as a year of paradox. The first half of the year saw a demand for products rising continuously; however, we are experiencing a hard landing as we end the year. At Texo, we can feel the recession to some extent; however, this also triggers us to strive to point out the productivity benefits of our Texo Equipment. Everyone must think and work in a LEAN way and by doing this we strongly believe we can help our customers to become even more productive long term. At this time we are in the process of hiring new staff to our team and we will be introducing them in the next issue of the Bulletin.

We would like to take this opportunity to thank all of our Customers and wish each and everyone a Merry Christmas & a Happy and Prosperous 2009.

Anders Svensson
